History: Fiction or Science? Chronology 1 Anatoly Fomenko

History: Fiction or Science? is the most explosive tractate on history ever written – however, every theory it contains, no matter how unorthodox, is backed by solid scientific data.

The book contains 446 graphs and illustrations, copies of ancient manuscripts, and countless facts attesting to the falsity of the chronology used nowadays, which never cease to amaze the reader.

Eminent mathematician proves that:

Does this sound uncanny? This version of events is substantiated by hard facts and logic, validated by new astronomical research and statistical analysis of ancient sources – to a greater extent than everything you may have read and heard about history before.

The dominating historical discourse in its current state was essentially crafted in the XVI century from a rather contradictory jumble of sources such as innumerable copies of ancient Latin and Greek manuscripts whose originals had vanished in the Dark Ages and the allegedly irrefutable proof offered by late mediaeval astronomers, resting upon the power of ecclesial authorities. Nearly all of its components are blatantly untrue!

For some of us, it shall possibly be quite disturbing to see the magnificent edifice of classical history turn into an ominous simulacrum brooding over the snake pit of mediaeval politics. Twice so, in fact: the first time, the legendary millenarian dust on the ancient marble turn into a mere layer of dirt – one that meticulous unprejudiced research can eventually remove.

The second, and greater, attack of unease comes with the awareness of just how many areas of human knowledge still trust the three elephants of the consensual chronology to support them. Nothing can remedy that except for an individual chronological revolution happening in the minds of a large enough number of people.
