This unique and comprehensive resource offers you a detailed treatment of the operations principles, key parameters, and specific characteristics of active and passive RF, microwave, and millimeter-wave components. The book covers both linear and nonlinear components that are used in a wide range of application areas, from communications and information sciences, to avionics, space, and military engineering.

This practical book presents descriptions and clear examples and of the best materials and products used in the field, including laminates, prepregs, substrates; microstrip, coaxial and waveguide transmission lines; fixed and rotating connectors; matching and adjusting elements; frequency filters; phase shifters; and ferrite gates and circulators. Moreover, the book offers you in-depth discussions on microwave switches and matrices, including MEMS technology, solid state and vacuum amplifiers, mixers, modulators and demodulators, and oscillation sources. You also find coverage of the stable frequency synthesizer structure and sources of modulated or noisy signals. Greatly adding to the usefulness of this volume is the inclusion of more than 700 Internet addresses of manufacturers from across the globe.

Contents: Devices for Signal Formation and Processing. Transmission Line Components. Passive Components. Fixed Frequency Filters. Control Components: Attenuators, Phase Shifters, time Delay lines, controllable Frequency Filters. Control Components: Switches and Matrices. Amplifiers. Frequency Mixers and Converters. Modulators and Demodulators. Frequency Multipliers and Dividers. Oscillation Sources. Frequency Controlled Oscillators. Frequency Synthesizers, Signal and Noise Sources. Appendices.

From reader reviews:

Gloria Robey:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each book has different aim as well as goal; it means that e-book has different type. Some people feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is reading a book. Think about the person who don't like studying a book? Sometime, person feel need book once they found difficult problem or even exercise. Well, probably you will require this Handbook of RF, Microwave, and Millimeter-Wave Components (Artech House Microwave Library).

Grady Long:

Would you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you never know the inside because don't assess book by its deal with may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer can be Handbook of RF, Microwave, and Millimeter-Wave Components (Artech House Microwave Library) why because the great cover that make you consider in regards to the content will not disappoint an individual. The inside or content is fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Charles Bock:

Many people spending their time by playing outside together with friends, fun activity having family or just watching TV all day long. You can have new activity to spend your whole day by reading through a book. Ugh, think reading a book can really hard because you have to bring the book everywhere? It all right you can have the e-book, having everywhere you want in your Smartphone. Like Handbook of RF, Microwave, and Millimeter-Wave Components (Artech House Microwave Library) which is having the e-book version. So , try out this book? Let's notice.

Walter Rojas:

A lot of guide has printed but it differs. You can get it by net on social media. You can choose the best book for you, science, comic, novel, or whatever by simply searching from it. It is named of book Handbook of RF, Microwave, and Millimeter-Wave Components (Artech House Microwave Library). You can add your knowledge by it. Without departing the printed book, it may add your knowledge and make anyone happier to read. It is most significant that, you must aware about publication. It can bring you from one location to other place.
