**Mathematics for Elementary Teachers: An Activity Approach** Albert Bennett, Ted Nelson, Laurie Burton

The primary purpose of *Mathematics for Elementary Teachers: An Activity Approach* is to engage prospective elementary and middle-school teachers in mathematical activities that will enhance their conceptual knowledge, introduce them to important manipulatives, and model the kind of mathematical learning experiences they will be expected to provide for their students. The activities incorporate inductive thinking and the use of physical models and visual images to develop concepts and encourage higher-level reasoning.

The *Activity Approach* can be packaged with Activity Sets that correspond to each section of the text and augment the ideas presented in the sections. Each Activity Set consists of a sequence of inductive activities and experiments that enable the student to build an understanding of mathematical ideas through the use of models and the discovery of patterns. In addition, over thirty Material Cards are included that complement the color cardstock materials in the Manipulative Kit. A section on *Ideas for the Elementary Classroom* at the end of each chapter includes a suggested Elementary-School Activity that has been adapted from one of the chapter's Activity Sets.

Additionally, a companion text, *Mathematics for Elementary Teachers: A Conceptual Approach*, is also available from the Bennett, Burton, and Nelson team. *Mathematics for Elementary Teachers: A Conceptual Approach* can be used independently or along with *Mathematics for Elementary Teachers: An Activity Approach*.

### **From reader reviews:**

#### **Elizabeth Cao:**

As people who live in the actual modest era should be change about what going on or information even knowledge to make these keep up with the era that is always change and advance. Some of you maybe will certainly update themselves by studying books. It is a good choice for you but the problems coming to a person is you don't know what kind you should start with. This Mathematics for Elementary Teachers: An Activity Approach is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

#### **Ronald Adams:**

In this period of time globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Typically the book that recommended to your account is Mathematics for Elementary Teachers: An Activity Approach this e-book consist a lot of the information of the condition of this world now. This kind of book was represented how does the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. Often the writer made some exploration when he makes this book. Here is why this book suitable all of you.

#### **Edward Carter:**

This Mathematics for Elementary Teachers: An Activity Approach is fresh way for you who has attention to look for some information since it relief your hunger info. Getting deeper you on it getting knowledge more you know or else you who still having bit of digest in reading this Mathematics for Elementary Teachers: An Activity Approach can be the light food to suit your needs because the information inside this book is easy to get by simply anyone. These books build itself in the form that is certainly reachable by anyone, yes I mean in the e-book contact form. People who think that in book form make them feel tired even dizzy this e-book is the answer. So there is no in reading a reserve especially this one. You can find what you are looking for. It should be here for you. So , don't miss the item! Just read this e-book kind for your better life and also knowledge.

#### **Bradford Bryant:**

As a pupil exactly feel bored to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just minor students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring along with can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So ,

this Mathematics for Elementary Teachers: An Activity Approach can make you experience more interested to read.
