Registered Health Information Administrator (RHIA) Exam Prep Guide: AHIMA - 2014 exam requirements Catherine Yager

Why write this book? Well when I started to prepare for my exam, I was hoping to find a book that gave me a brief overview of the content that I might see on the test. Of course, I did find a number of books that gave practice questions but not too much when it came to a review of the content. And what I did find was little more than a book that gave an outline of information with no detail. So that's the reason for this book, to give you a brief review of the information you could see on the test. I'm not saying it's perfect. In fact, I'm hoping that if you find deficiencies you would let me know at me@catherineyager.com.

This book is broken up by the domains and subsections within each of the domains. The subject matter itself is current as far as 2014 and is provided by AHIMA. The content itself is meant to be a memory jog instead of a full explanation of each domain objective. If you find yourself getting confused by any information, you will probably need to refer to your books from school and look up a more detailed explanation. As you finish each of the domains it will immediately be followed by practice questions and an easy method of checking the answer.

To help you with your studies, the preface, tips, and each of the Domains is set up with a MP3 so you can take the file and listen to it when you do exercises or other work. You will also have access to a PDF version of the book if you find it hard to see the graphics within the kindle edition.

Contents

Preface

Tips for Taking the RHIA Exam

Domain I - Data Content, Structure & Standards (Information Governance)

(18-22%)
